legs - feet

It is difficult to imagine the levels of stress, load and tension our feet and ankles are subjected to every day. Every step, every flight of stairs, all the loads we carry, put pressure on this area of our body.

Moreover, the soles of the feet are connected, by extension, to the entire body. The two Jacuzzi jets positioned at the height of the feet, not only restore strength and relieve fatigue, but reactivate the blood flow and stimulate a beneficial flow of energy throughout the body.
